- JS
- HTML/CSS
- React
- BOOTSTRAP

BI Tools:

- Amazon QuickSight
- Microsoft Power BI

DBMS:

- SQL
- SAP HANA

Basic knowledge:

- Python
- GIT

Tools for work:

- Jira
- Slack

Have experience:

- Pandas
- Docker

ABOUT ME

Hello, everyone! My name is Artem

Formerly a data analyst. Now at the beginning of the career of a front-end developer. Passed a course on javascript from Genius Space and Mate Academy. I am also in the final stage of a course on HTML/CSS.

In parallel, I'm studying React and Next JS.

I really want to get a job in the field of front-end, because I enjoy creating websites and their dynamism.

I will be glad to hear your suggestions.

WORK EXPERIENCE

Pet Project AviationFly

- Working on PetProject (converter flight route from Amadeus style to readable style for average person)
- Use HTML/CSS (Create light design this web-application)
- JS (Development inner functionality, parse line(flightroute) from Amadeus)
- jQuery (read file json)
- Bootstrap (use style for design web-application)
- Power BI (use this application in order to get andtransformation IATACode from site)
